1. A supply agent received twice weekly from the mill at Campulung, Bucovina, 5,000 kilograms of flour whose composition was 80% corn and 20% wheat. This flour was for the ultimate use of a special working unit of 5,000 men engaged in the construction of underground fortifications and barracks in the Carlibaba area between Borsa and Vatra Dornei. The consignments are always marked with a code number beginning with three zeros and followed by five or six other digits. Such markings are customary for consignments sent on behalf of the Food Ministry.
2. Two large grain depots with a capacity of 500 or 600 tons each have been built at Campulung, Bucovina. They are located 500 meters behind the Campulung railroad station, opposite the mill and 700 meters distant from it. These depots are of wooden construction with concrete supports and tin roofs.
